

LEAVING THINGS AS THEY ARE LEAVES A LOT OF FOLKS IN A SINKING BOAT.

WE CAN MAKE A WORLD OF DIFFERENCE.

There are over 1.5 million Tennesseans in need of mental health treatment. Only one third of these citizens will receive treatment of any kind and, for those who do, the prognosis—given our present system—is not good.

We need your help, legislators and constituents both, to close this large and critical gap in healthcare in our state—a gap that delays access to effective integrated care, overburdens primary care physicians and leads to out-of-control pharmacy costs.

With a concerted, unified effort, we can create a sea change that gets patients the help they need more quickly, more efficiently and more cost effectively. That success, in turn, will get more people back to a productive life, a life that builds community and self-worth rather than draining the very life force of our state.

**THANK YOU FOR YOUR INTEREST
AND YOUR CARE.**
